HEMATOLOGY

Test Name: (Hematology)

Sample Type: Citrated Plasma

PT (APTT) (Citrated Plasma)

Test Observations:

1. All samples sent for coagulation must be filled till the frosted mark on the vial.
2. Blood samples should not be collected from intravenous lines.
3. Normal coagulation results do not exclude clotting abnormalities.
4. In results above the normal range-
 - a. Heparin contamination must be excluded.
 - b. Clinical correlation for history e.g liver disease, prolonged antibiotic usage, infection, bleeding disorder, neoplasm etc should be done.
5. Abnormal results may be followed up by repeating, mixing studies, factor assays or inhibitor testing, etc.
6. For thrombophilia testing samples should be sent 4-6 weeks after the acute episode to prevent false positive results.
7. In case of any discrepancies noted please communicate with lab immediately on the numbers provided.
